

MYLNE BOLT 18 electric tender

Dakota Edition

SPECIFICATION

DESIGN: Mylne Yacht Design

ENGINEERING: Mylne Design & Naval Architecture

LENGTH: 5.5m / 18ft

BEAM: 1.85m / 6ft

DRAFT: 0.5m / 1.5ft

WEIGHT: 750Kg

CONSTRUCTION: Aluminium

CAPACITY: 6 persons

CATEGORY: EU Category C

ENGINE: Electric 100Kw/135BHP

SPEED: 30Kn Max

RANGE: 20Kn-10Nm

5Kn-50Nm

BATTERY: 24KwH Lithium phosphate

CHARGER: 5Kw onboard

MYLNE BOLT 18 electric tender

Dakota Edition

Bolt 18 is a new fast electric yacht tender in a classic Mylne style. It is the baby in a new range of ultra-quiet tenders and sportsboats from Mylne, with a top speed exceeding 30 knots.

Key features of the Bolt design are all electric or hybrid propulsion, unobstructed internal decks, and on the Bolt 18 we have a drop down transom gate for easy swimming or waterskiing access. The traditional propeller (or waterjet option) is turned by the latest neodymium brushless DC motor with efficiencies of 95%. The Lithium cells are compiled into a unique and compact 400Volt battery bank giving the Bolt world beating range and power.
